

Azure DevOps Workflow Automation

Lab Practice & Verification Report

Student Name:	Mathew K Cheriyan
Email Address:	mkcheriyan997@gmail.com
Course Name:	IPSR Summer Internship
Task Domain:	DevOps CI/CD Automation
Execution Date:	June 23, 2026

Part 1: Short Questions and Answers

Q1. What triggers the pipeline?

The pipeline is triggered by changes pushed to the 'main' branch.

Q2. Where is the code stored?

The code is stored in the Azure DevOps Git repository named 'sample-app'.

Q3. What executes the pipeline?

The pipeline is executed by an Azure DevOps hosted agent using the 'ubuntu-latest' virtual machine image.

(Note: For this local verification lab, a self-hosted agent was deployed in the Default pool of the workstation control node to bypass the default Microsoft-hosted parallel job limitation).

1. Organization Page

Showing the organization 'mkcheriyan997' and project settings.

2. Project Page

Showing the private project 'devops-lab'.

3. Repository Page

Showing the repository 'sample-app' and git file list.

4. YAML Configuration File

Showing the 'azure-pipeline.yml' file contents.

The screenshot displays the Azure DevOps web interface. The top navigation bar shows 'Azure DevOps' and the user 'mkcheriyan997'. The left sidebar contains a menu with 'Overview', 'Boards', 'Repos' (highlighted), 'Pipelines', and 'Artifacts'. The main content area is titled 'azure-pipeline.yml' and displays the following YAML configuration:

```
1 trigger:
2   - main
3
4 pool:
5   name: 'Default'
6
7 steps:
8   - script: |
9       echo "Azure DevOps Pipeline Running"
10      date
11      displayName: 'Run Script'
```

5. Pipeline Dashboard

Showing the created pipeline 'demo-pipeline'.

The screenshot displays the Azure DevOps web interface. The browser's address bar shows the URL `https://dev.azure.com/mkcheriyan997/devops-lab/_build`. The page header includes the 'Azure DevOps' logo and the user 'mkcheriyan997'. A left-hand navigation pane lists 'Overview', 'Boards', 'Repos', 'Pipelines' (which is selected and highlighted with a blue bar), and 'Artifacts'. The main content area is titled 'Pipelines' and features a 'New pipeline' button in the top right corner. Below this, a section titled 'Recent Pipelines' contains a single entry for 'demo-pipeline'. This entry shows the source as 'sample-app • main branch' and indicates the last run was '#20260623.2' with a status of 'Succeeded'.

Recent Pipelines	
demo-pipeline sample-app • main branch	Last run: #20260623.2 Succeeded

6. Pipeline Execution Summary

Showing the successful pipeline run #20260623.2.

The screenshot displays the Azure DevOps web interface. At the top, there's a browser window with the URL `https://dev.azure.com/mkcheriyan997/devops-lab/_build/results?buildId=2`. Below the browser window, the Azure DevOps header shows the user `mkcheriyan997` and a profile icon. The left sidebar contains navigation links: Overview, Boards, Repos, Pipelines (highlighted), and Artifacts. The main content area shows the details for a pipeline run:

- Pipeline:** demo-pipeline / Run #20260623.2
- Status:** Triggered manually by Mathew K Cheriyan
- Result:** A green box with a checkmark and the text "Succeeded".
- Summary:**
 - Repository: sample-app (Git)
 - Duration: 14s
 - Commit: 04c899d (Update pool to Default for self-hosted agents)
 - Agent Pool: Default (workstation-agent)

7. Pipeline Run Logs

Showing the execution stdout of the 'Run Script' step with the correct Welcome message and Date/Time output.

The screenshot shows the Azure DevOps web interface. The top navigation bar includes the 'Azure DevOps' logo and the user 'mkcheriyan997'. The left sidebar contains navigation links: Overview, Boards, Repos, Pipelines (highlighted), and Artifacts. The main content area displays the 'Run #20260623.2 > Logs' for a specific pipeline run.

Job Steps:

- Initialize job
- Checkout sample-app
- Run Script** (selected)
- Post-job Checkout
- Report build status

Run Script Logs:
